

Full Stack PHP Developer (Mid-weight)

r//evolution is seeking a talented and experienced developer to join their team. This role offers a great opportunity to develop your career and take it to the next level. You will be part of a small but effective team of developers whose responsibilities include building new sites, services and products in addition to updating and supporting existing assets.

About the Role:

The role has a focus on CMS customisation, API integration and back-end development work as well as front-end HTML/CSS development. We work primarily on the Magento, HubSpot, WordPress and Drupal platforms with custom PHP web applications built using frameworks such as Yii, Symfony and Laravel.

To deliver in this role the essential skills/experience you will need are:

- 2-3 years + of commercial experience
- Strong HTML, CSS(3) and jQuery
- Good working knowledge of PHP and MySQL
- Experience of APIs and data migration
- Experience in OOP
- Experience turning design documents into responsive markup
- Experience with at least one PHP based framework (Yii, Symfony, Zend, Laravel)
- Experience with at least one frontend framework (Foundation, Bootstrap)
- Experience of CSS pre-processors (SASS / LESS)
- Experience of version control, we use Git
- Strong troubleshooting and investigation skills
- Good working knowledge of best practice development techniques (accessibility, SEO, security, PSR compliance)
- Experience working in a process-driven environment
- Strong communication skills
- An appetite for personal learning and development
- A can-do attitude
- A keen eye for detail

It would be helpful if you also have the following skills/experience:

- Understanding of cross-browser quirks
- Magento experience
- Experience of JavaScript task runners (grunt, gulp)
- A good understanding of Linux-based hosting environments
- A working understanding of internet architecture
- Experience with Sketch design tool
- Comfortable talking with clients and attending meetings

- An interest in the state and shape of the web industry

You will also contribute to r//evolution's success by:

- Becoming an integral member of the r//evolution team, contributing to all our work, whilst focusing on and delivering an outstanding Development offer.
- Being a brand ambassador for r//evolution, cementing great relationships with clients and colleagues.
- Where necessary supporting other staff to grow an effective, engaged and profitable team.

r//evolution is flexible, dynamic and ambitious with a client-centric ethos. As such it is impossible to list all the responsibilities and duties you will be asked to perform, but this document provides a reference point for core responsibilities. r//evolution's offices are in Gateshead, Tyne & Wear and Spinningfields, Manchester. One of the offices will be the main base for the role, but you may be required to travel to client's premises if required.

In exchange, you can expect to receive the following benefits;

- A positive, supportive, results focused working environment
- A competitive salary, plus financial rewards for meeting business goals
- The opportunity to progress within r//evolution's structure
- Pension
- Health Insurance
- 20 days holidays (plus 3 discretionary days over the Christmas period)
- CPD time allocation

If you are interested in this exciting opportunity, please submit your CV to adam@r-evolution.co.uk, together with a letter outlining your suitability for the role.
